EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Frank Coppa on May 2, 2007.

The application has been amended as follows:

Please replace the last two lines of claim 34 with,

-- ceramic core which contains a silica char, wherein the outer surface of the ceramic core defines the shape of at least one internal cavity of a turbine component. --

The Examiner suggested to Applicant that the above language would better define the relationship between the core and the turbine component. Applicant indicated that they were amenable to this modification of claim 34.

Applicant has suitable addressed the claim objections and rejections stated under 35 U.S.C. § 112, 2nd paragraph hence these are withdrawn. Concerning the prior art rejections over *Mine*, *Atwell*, and *Schilling*, Applicant now stipulates that the claimed core is one having outer dimensions that would be complimentary to/the mirror image of the internal cavity of a turbine. Mine et al. contemplate using their ceramic material as a

Art Unit: 1712

sheath for electric conductors, there being not even a remote indication that similarly shaped cores are contemplated. Atwell does not mention a specified shape associated with the densified green bodies disclosed therein and, therefore, a core with outside dimensions/features that defines the shape of at least one internal cavity of a turbine component is not fairly suggested. Schilling does mention gas turbine blades as an application for their ceramic product but only in the context of making a composite, i.e. where the ceramic would represent a protective layer of the turbine blade as opposed to shaped article used in casting the metal article for turbine blade production.

An updated survey of the prior art did not yield a reference more germane to the instant invention than any of those already of record. Accordingly, claims 17-24, 26-27, 34, 36, and 38-41 are deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc S. Zimmer whose telephone number is 571-272-1096. The examiner can normally be reached on Monday-Friday 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone
